

REMINGTON SW

ABOUT THE BRAND

CHOOSE QUALITY

Remington clothing is made of technological materials: it is waterproof, windproof, it is resistant to mechanical damage, and has good breathable properties. The models provide all the necessary functional elements that replace additional equipment. You just get the most out of your hobby.

We love our job and we put a lot of effort into it to obtain the best characteristics in clothes and equipment. We know how important convenience and quality are for a modern person. While developing a brand for outdoor activities, we took care of its affordability so that any beginner could buy the equipment of a professional, and the professional would continue to rely on his experience.

OUR MISSION WORKING WITH PEOPLE AND FOR PEOPLE

We always remember that people who will use our things are people like us. Therefore, we do it "as for ourselves", delving into the needs of customers. So our clothes become more convenient and functional — we do not forget about the context of their use, and the service is transformed from "service" to "care"

VALUES BEING HONEST

Being honest, being responsible for what you are doing and respecting others are simple rules that should determine relationships both in the family and in work. Remington Synergy World is the company where sons work side by side with their parents. Therefore, family values — are obvious and understandable — are also company values.

Remington®
SYNERGY WORLD

CLOTHING PRODUCTION: FROM THE FIRST DRAFT TO PURCHASE

WE DESIGN

We design the sketches for our future products ourselves. We are trying to create a "national brand" that will satisfy the needs of everyone, both amateur and professional..

WE SEW

All the products are sewn on professional equipment. Only from high quality, practical, and wear-resistant materials. Also, our products use high-quality and reliable accessories.

WE GUARANTEE

We are responsible for our products even after the sale. To achieve a high level of clothing and footwear, as well as accessories products quality control is carried out at each stage of production.

ProHeat is premium — class insulation. It has high breathability. It is hypoallergenic and safe for the skin. Hi-tech technologies were used in developing the fiber that allowed to imitate natural down. ProHeat is composite insulation. It consists of microfibers that hold air and fibers of large diameter that increase its' volume.

It provides high heat insulating properties per weight unit and a compact appearance product. ProHeat has a huge advantage — it is waterproof. All the products with this insulation completely restore their form after compression and deformation.

Climatic Extreme is a highly waterproof breathable material. Three layers system consists of outer textile, membrane, and lining. The membrane provides the main properties of the material. Climatic Extreme is a thin fluoroplastic membrane that has a large number of holes per square unit.

Those holes are very small in size, therefore, water molecules in vapor form are passing through the membrane, however, water drops due to their larger size do not.

Climatic Pro is a membrane that provides protection from wind and weather. Due to absolute windproof and maximum vapor permeability, products with Climatic Pro will longer keep comfortable state in different weather conditions and activities.

Climatic Pro is perfect for intense outdoor activities such as hunting, fishing, etc. in any weather conditions

DWR is one of the most used acronyms in the world of outdoor apparel and gear. It stands for "durable water repellent" and is used to process various fabrics that are used in tailoring, backpacks, awnings, and even sleeping bags.

DWR is a layer of durable hydrophobic polymer that is applied to the material and forms a specific structure that reduces the surface tension coefficient. This causes water droplets to roll off the treated material without wetting it.

INFINITY LINE

The most technologically advanced line from the Remington collection. INFINITY is the quintessence of stylish solutions and technologies of the 21st century. Advanced equipment design will give the wearer a significant head start in competition with other hunters. "Well, he's in Remington, he can be everywhere!". The idea of our developers initially lies in the awareness of the situation when you have to overcome difficulties and obstacles.

Vapor permeability up to 20 000 g/m²/24 hours
Water resistance up to 15 000 mm

Remington equipment compares favorably with analogs:

- Increased moisture resistance and moisture repellency;
- Improved vapor permeability;
- Preservation of heat;
- Manufacturability;
- Extremely high wear resistance;
- Increased ease.

All this creates the effect of a confident cocoon of safety, comfort, and confidence in every next step of the Remington wearer.

UNLIMITED LINE

Stylish Remington gear for ultimate comfort. Recognizable design, adaptive, design features, and optimal technological characteristics. In this line, you can comfortably stay alone with nature for as long as you want. UNLIMITED! For hunting and outdoor activities, we use fabrics created using the latest technologies — Climatic Pro, Climatic Extreme membranes, Pro Heat insulation, and much more.

Vapor permeability up to 10 000 g/m²/24 hours
Water resistance up to 10 000 mm

Remington fabrics meet all the requirements, namely:

- Preservation of optimal body temperature
- Independence from weather conditions
- Low noise level
- Breathability
- Wear resistance
- Waterproof
- Lightweight
- Ergonomics

You will forget about all the problems as soon as you put on Remington. Behind is experiencing, ahead is an adventure.

UNIVERSAL LINE

City life revolves around you. This dynamic charges with new energy. Get comfortable in the rhythm of the city with Remington. UNIVERSAL LINE — stylish city wear for every day. Comfortable and practical clothing models, laconic design, and the presence of all the necessary technological features give confidence on a walk and driving in the city stream.

Vapor permeability up to 3 000 g/m²/24 hours
Water resistance up to 3 000 mm

Requirements for this line:

- Convenience;
- Reliability;
- A combination of quality and simplicity;
- Compliance with the type of recreation and climate.

Make expectations a reality? There are no impossible tasks for Remington.

PRO HUNTING CLUB

Remington Pro Hunting Club is an innovative winter costume that is made according to updated technology and meets all modern standards. Due to the high collar with a lining, as well as a heater that has the properties of goose down, the costume can withstand wide temperature ranges. In addition, the insulation does not deform at all during washing and wear and retains its original form. The suit is completely waterproof and has increased breathing ability.

NECESSITY

The unrivaled warmth of down in a Climatic Pro casing — is a suit for too low temperatures. The suit embodies the perfection of form and function. Compact, with anatomical cut, the clothes follow the contours of your body, giving you comfort and freedom of movement. Its many features include inner cuffs, a waterproof front zip, an insulated hood, chest and hand pockets, and even a decoy pocket. The out side is made of lightly brushed material that reduces noise to a minimum. The jacket is shortened, designed to be worn together with semi-overalls. Overalls with zippers for 2/3 of the length of the trousers for the convenience of wearing any shoes. Very lightweight but one of the warmest suits in the collection.

LIFEGUARD

The main feature of the Remington Lifeguard overalls is their ability to stay on the surface of the water, like a bobber, while the user does not get wet. On the sleeves of the upper part of the product, there are adjustable cuffs, which you adjust to the parameters of your hand, a neck with adjustable drawstrings. Visor protects the face from precipitation. Remington is also concerned by safety. Overalls are equipped with reflective elements, a signal whistle, and bright color accents.

CHAMPION

The Remington Champion suit is perfect for comfortable fishing or tourism. That is a practical and high-quality suit, that will reliably protect the owner from moisture, wind, precipitation, and cold. The model consists of several elements. The cuffs of the sleeves are narrower and do not let the cold, rain, snow inside. Regulation is provided. A high stand-up collar covers the neck and part of the face from wind and precipitation. The second part of the set is a jumpsuit. Because of their style, wide-cut trousers do not hinder movement. Moreover, it is convenient to fix on shoes.

SEVERE WINTER

The Remington Severe Winter suit is specially designed for winter fishing. The model is made of membrane fabric Climatic Pro. Thanks to modern Pro Heat insulation and an additional fleece lining, it is designed for temperatures up to -35 degrees. For maximum protection from the cold, the suit has a hood with a high stand, which allows you to cover your face from the cold wind. Adjustable cuffs on the sleeves and trousers and a windproof "skirt" inside the jacket protect against wind and retain your body heat. The back of the suit is additionally reinforced with rubberized Oxford fabric for the best protection against getting wet. The model has a free cut that does not restrict freedom of movement.

HUNTING SHIRTS

The Remington Shirt is for those who value the practicality and versatility of clothing. This model can be used outdoors, during fishing, hunting, tourism, and it will also be convenient to play sports. The soft, tactilely pleasant, elastic fabric of the product contains spandex. Because of that, the T-shirt is light, does not wrinkle, dirt and stains can be easily removed from it, the color will delight you with its brightness for a long time. In warm weather, this T-shirt can be used as the main item, and it is designed for the bottom, "breathable" layer in cold weather.

UNIVERSAL LINE

PORTER GREEN

A comfortable Remington Porter Green fleece suit is the best option for fishing, hunting, and tourism at different times of the year. Fleece items are hygroscopic and can retain heat for a long time due to the structure of the fabric. The suit can be used as a second layer under outerwear in the cold season - which will create even more insulation, and there will be no additional weight load: fleece is a very light and compact material. Using the suit with the second layer, you do not have to feel stiffness or constantly correct something. The material of the suit is soft and smooth — providing additional tactile comfort.

UNIVERSAL LINE

EXTREME

High breathability returns its body's heat by 20% and allows to dry quickly.

Thermal underwear is made of high quality polyester that is insulated with polar fleece. It is bacteriostatic, soft, elastic and tight to the body. Extreme line has the aforementioned properties due to the use of two-layer knitwear that is subjected to special processing. The material of the product is highly breathable. It is perfect for wearing in low, medium and high activity modes. Fleece quickly absorbs excess moisture. Even wet this model breathes and continues to retain heat.

Art. RH 2015-301

Sizes S-3XL

100% polyester with two-sided processing

Insulation: 230 gsm polarfleece

Temp. conditions: up to -35 °C

INTENSIVE CAMO

NEW

Thermal underwear Remington Intensive Camo is a new model from the brand Remington. The material of the fabric is 88% polyester and 12% elastane. Inside, the fabric has a soft microfleece of 250 gsm, which allows you to keep warm at temperatures down to -35 degrees. The fabric of the product is thin, which makes the model invisible under the main clothing. The special structure of the fabric with an inner layer of microfleece allows you to effectively remove and redistribute moisture from the body during physical activity.

Art. RH 2017-935

Sizes S-3XL

88% polyester, 12% elastane microfleece 250 gsm

Temp. conditions: up to -35 °C

ACTIVE EXPEDITION

Fleecy, elastic, well-fitting tissue creates a microclimate around the body. The synthetic composition of the fabric provides high vapor permeability, quick drying. Tight fit and flat seams for ease of movement and better thermoregulation. Used as a base layer.

Art. RH 2016-934

Sizes S-3XL

95% Polyester, 5% elastane

Insulation: 350 gsm fleece

Temp. conditions: up to -35 °C

THERMAL REFLECTIVE

High breathability returns its body's heat by 20% and allows to dry quickly.

Has innovative technology of "smart" thermoregulation. This technology does not only preserve the natural warmth, but also removes excess moisture to the outside. The heat retention increases up to 20%. The advantage of REFLECTIVE technology is that heat resistance is achieved not by increasing the thickness of the insulation, but by use of reflective lining.

Art. RH 2014-010

Sizes S-3XL

90% Polyester, 10% elastane 170 gsm

4XL	132-136	106-110	126-130	51-53	66

Take all measurements of your figure. Take measurements accurately without leaving a margin. While designing and manufacturing hunting clothes, we take into account sufficient freedom in accordance with your size and type of clothing. If you prefer clothes to sit on you freely, please choose one size larger.

Don't rely on the world size standards.

Different reproducers offer varied standards and sizes. If your waist is 105 and particular pants waist is 102 or 108, we recommend to choose bigger size. Most of Remington clothes has extra regulators for exactly ascertainment of size for maximal comfort.

TROUSERS

	H	B	C
Size	Inside Leg, cm	Waist ,cm	Hips ,cm
