SYNERGY WORLD

REMINGTON SW

ABOUT THE BRAND

CHOOSE QUALITY

Remington clothing is made of technological materials: it is waterproof, windproof, it is resistant to mechanical damage, and has good breathable properties. The models provide all the necessary functional elements that replace additional equipment. You just get the most out of your hobby.

We love our job and we put a lot of effort into it to obtain the best characteristics in clothes and equipment. We know how important convenience and quality are for a modern person. While developing a brand for outdoor activities, we took care of its affordability so that any beginner could buy the equipment of a professional, and the professional would continue to rely on his experience.

OUR MISSION WORKING WITH PEOPLE AND FOR PEOPLE

We always remember that people who will use our things are people like us. Therefore, we do it "as for ourselves", delving into the needs of customers. So our clothes become more convenient and functional — we do not forget about the context of their use, and the service is transformed from "service" to "care"

VALUES BEING HONEST

Being honest, being responsible for what you are doing and respecting others are simple rules that should determine relationships both in the family and in work. Remington Synergy World is the company where sons work side by side with their parents. Therefore, family values — are obvious and understandable — are also company values.

CLOTHING PRODUCTION: FROM THE FIRST DRAFT TO PURCHASE

WE DESIGN

We design the sketches for our future products ourselves. We are trying to create a "national brand» that will satisfy the needs of everyone, both amateur and professional..

WE SEW

All the products are sewn on professional equipment. Only from high quality, practical, and wear-resistant materials. Also, our products use high-quality and reliable accessories.

WE GUARANTEE

We are responsible for our products even after the sale. To achieve a high level of clothing and footwear, as well as accessories products quality control is carried out at each stage of production.

ProHeat is premium — class insulation. It has high breathability. It is hypoallergenic and safe for the skin. Hi-tech technologies were used in developing the fiber that allowed to imitate natural down. ProHeat is composite insulation. It consists of microfibers that hold air and fibers of large diameter that increase its' volume.

It provides high heat insulating properties per weight unit and a compact appearance product. ProHeat has a huge advantage — it is waterproof. All the products with this insulation completely restore their form after compression and deformation.

Climatic Extreme is a highly waterproof breathable material. Three layers system consists of outer textile, membrane, and lining. The membrane provides the main properties of the material. Climatic Extreme is a thin fluoroplastic membrane that has a large number of holes per square unit.

Those holes are very small in size, therefore, water molecules in vapor form are passing through the membrane, however, water drops due to their larger size do not.

Climatic Pro is a membrane that provides protection from wind and weather. Due to absolute windproof and maximum vapor permeability, products with Climatic Pro will longer keep comfortable state in different weather conditions and activities.

Climatic Pro is perfect for intense outdoor activities such as hunting, fishing, etc. in any weather conditions

DWR is one of the most used acronyms in the world of outdoor apparel and gear. It stands for "durable water repellent" and is used to process various fabrics that are used in tailoring, backpacks, awnings, and even sleeping bags.

DWR is a layer of durable hydrophobic polymer that is applied to the material and forms a specific structure that reduces the surface tension coefficient. This causes water droplets to roll off the treated material without wetting it.

INFINITY LINE

The most technologically advanced line from the Remington collection. INFINITY is the quintessence of stylish solutions and technologies of the 21st century. Advanced equipment design will give the wearer a significant head start in competition with other hunters. "Well, he's in Remington, he can be everywhere!". The idea of our developers initially lies in the awareness of the situation when you have to overcome difficulties and obstacles.

Remington equipment compares favorably with analogs:

- Increased moisture resistance and moisture repellency;
- Improved vapor permeability;
- Preservation of heat;
- Manufacturability;
- Extremely high wear resistance;
- Increased ease.

All this creates the effect of a confident cocoon of safety, comfort, and confidence in every next step of the Remington wearer.

UNLIMITED LINE

Stylish Remington gear for ultimate comfort. Recognizable design, adaptive, design features, and optimal technological characteristics. In this line, you can comfortably stay alone with nature for as long as you want. UNLIMITED! For hunting and outdoor activities, we use fabrics created using the latest technologies — Climatic Pro, Climatic Extreme membranes, Pro Heat insulation, and much more.

Remington fabrics meet all the requirements, namely:

- Preservation of optimal body temperature
- Independence from weather conditions
- Low noise level
- Breathability
- Wear resistance
- Waterproof
- Lightweight
- Ergonomics

You will forget about all the problems as soon as you put on Remington. Behind is experiencing, ahead is an adventure.

UNIVERSAL LINE

City life revolves around you. This dynamic charges with new energy. Get comfortable in the rhythm of the city with Remington. UNIVERSAL LINE — stylish city wear for every day. Comfortable and practical clothing models, laconic design, and the presence of all the necessary technological features give confidence on a walk and driving in the city stream.

Requirements for this line:

- Convenience;
- Reliability;
- A combination of quality and simplicity;
- Compliance with the type of recreation and climate.

Make expectations a reality? There are no impossible tasks for Remington.

UNIVERSAL LINE

BLIZZARD 3 IN 1

The unique transforming suit consists of an outer jacket, semi-overalls, and a jacket-liner. Straight-cut outer jacket. Climatic Extreme membrane that provides absolute windproof, and maximum vapor permeability. The elbow is protected by dense fabric. The liner jacket serves as additional insulation and, if necessary, can be removed. Comfortable cuffs with finger slits. The semi-overalls have a free cut that does not restrict movement.

INFINITY LINE

PRO HUNTING CLUB

Remington Pro Hunting Club is an innovative winter costume that is made according to updated technology and meets all modern standards. Due to the high collar with a lining, as well as a heater that has the properties of goose down, the costume can withstand wide temperature ranges. In addition, the insulation does not deform at all during washing and wear and retains its original form. The suit is completely waterproof and has increased breathing ability.

NECESSITY

The unrivaled warmth of down in a Climatic Pro casing — is a suit for too low temperatures. The suit embodies the perfection of form and function. Compact, with anatomical cut, the clothes follow the contours of your body, giving you comfort and freedom of movement. Its many features include inner cuffs, a waterproof front zip, an insulated hood, chest and hand pockets, and even a decoy pocket. The out side is made of lightly brushed material that reduces noise to a minimum. The jacket is shortened, designed to be worn together with semi-overalls. Overalls with zippers for 2/3 of the length of the trousers for the convenience of wearing any shoes. Very lightweight but one of the warmest suits in the collection.

LIFEGUARD

The main feature of the Remington Lifeguard overalls is their ability to stay on the surface of the water, like a bobber, while the user does not get wet. On the sleeves of the upper part of the product, there are adjustable cuffs, which you adjust to the parameters of your hand, a neck with adjustable drawstrings. Visor protects the face from precipitation. Remington is also concerned by safety. Overalls are equipped with reflective elements, a signal whistle, and bright color accents.

STORMFRONT

Due to the latest technology of gluing the seams, you will not get wet even under heavy rainfall. There are several pockets under the zipper on the jacket. The hood is self-adjusting, narrowed closer to the hands and does not let the wind and precipitation inside. On the back of the product, in the lumbar and buttocks area, there is an additional protective fabric, for example, if you sit down in nature on something wet, this fabric will protect you from getting wet.

NIGHT COYOTE

The demi-season Remington "Night Coyote" costume will be perfect for any type of holiday. It is made with innovative technology of insulation, which gives it the opportunity to be both warm and light at the same time. Costume consists of an upper jacket, semi-overalls. Jacket has a removable, adjustable drawstring hood with a small visor. The hood is fixed under the chin with a special Velcro flap. The jacket is fastened with a zipper and a windproof valve with Velcro. For greater comfort, the main lining is made of soft and warm fleece. The sleeves are equipped with internal elastic cuffs with Velcro straps which you can adjust.

The semi-overalls have a free, not constraining movement cut. High back protects you from cold air. Elastic at the waist allows you to securely fill the sweater.

UNIVERSAL LINE

ACTIVE EXPEDITION

Fleecy, elastic, well-fitting tissue creates a microclimate around the body. The synthetic composition of the fabric provides high vapor permeability, quick drying. Tight fit and flat seams for ease of movement and better thermoregulation. Used as a base layer.

Art. RH 2016-934 Men's RL 2016-934 Women's

Size S-4XL

Size XS-2XL

95% polyester, 5% spandex
Insulation: 350 gsm fleece

THERMAL REFLECTIVE

High breathability returns its body's heat by 20% and allows to dry quickly. Has innovative technology of "smart" thermoregulation. This technology does not only preserve the natural warmth, but also removes excess moisture to the outside. The heat retention increases up to 20%. The advantage of REFLECTIVE technology is that heat resistance is achieved not by increasing the thickness of the insulation, but by use of reflective lining.

Size S-3XL

Size XS-3XL

90% polyester, 10% spandex, 170 gsm

HEAT GENERATION

Remington Heat Generation thermal underwear is the best choice for cold climates. Dual-layer stretch fabric provides body comfort and fast steam wicking. Built-in heating elements allow you to quickly reach a comfortable temperature and keep warm (**power bank not included**). The model has three heating modes, each of which is indicated by a color indicator on the power button. The model has a separate connection of the jacket and trousers, which allows you to achieve a comfortable temperature in the desired area of the body.

Insulation: 90% polyester, 10% spandex, 140 gsm

INTENSIVE CAMO

Thermal underwear Remington Intensive Camo is a new model from the brand Remington. The material of the fabric is 88% polyester and 12% elastane. Inside, the fabric has a soft microfleece of 250 gsm, which allows you to keep warm at temperatures down to -35 degrees. The fabric of the product is thin, which makes the model invisible under the main clothing. The special structure of the fabric with an inner layer of microfleece allows you to effectively remove and redistribute moisture from the body during physical activity.

MOLDING CAP

Art. RM 1542-306
Size S/M L/XL
Demi-season
100% polyester

The hunting cap will reliably protect against snow and wind. The DWR impregnation ensures water resistance. The wide visor of the cap protects against direct sunlight.

The Remington Protection cap will protect your ears from the wind and precipitation. The soft fleece lining will retain warmth. The cap's wide visor will save you from direct sunlight.

Fleece hat for hunters, anglers, and outdoor enthusiasts. Made from high-quality fleece, it withstands significant drops in temperature during the winter period and protects against the wind.

TACTICAL SOFT

Art. RM 1510-993
 one size
 Demi-season
 100% Polyester

The Remington Tactical Soft Figure Kit will reliably protect you from extreme cold, wind, and precipitation. The presented set consists of a hat and a snood. Immediately, you can wear them both together and separately. The edges of the chest are treated with a soft cloth, so the risk of chafing the skin is minimized. A big plus of the snood is that it has a loose fit; it is easy to adjust it on your own: put it on higher or lower. Also, this attribute will perfectly protect the neck, part of the face, and part of the chest area from wind and precipitation.

PROTECTION AGAINST

Art. RUA13-013

EXPECTED RESULT

The Remington Expected Result shoes — are specially designed for fishing and outdoor enthusiasts in the summer. The front part of the model is made of a special mesh, which provides air circulation and eliminates overheating of the legs. The additional fabric is provided inside the model to protect it from sand and dust. The back of the boots is made of neoprene, the material stretches well, due to which the boots are comfortable to put on. The EVA outsole is lightweight and has excellent cushioning to reduce stress when walking. Fishing enthusiasts can use them in the water without fear of damaging their legs.

4XL	88	106-110	126-130

Take all measurements of your figure. Take measurements accurately without leaving a margin. While designing and manufacturing hunting clothes, we take into account sufficient freedom in accordance with your size and type of clothing. If you prefer clothes to sit on you freely, please choose one size larger.

Don't rely on the world size standards.

Different reproducers offer varied standards and sizes. If your waist is 105 and particular pants waist is 102 or 108, we recommend to choose bigger size. Most of Remington clothes has extra regulators for exactly ascertainment of size for maximal comfort.

FOOTWEAR

A	EUR	39	39,5	40	41	41,5	42	42,5	43	44	45	45,5	46	47,5
	US	6,5	7	7,5	8	8,5	9	9,5	10	10,5	11	11,5	12	13
	Foot length, mm	245	250	255	260	265	270	275	280	285	290	295	300	310

If you are between two sizes, select a larger size.

We do not recommend measuring foot in the morning. Usually the legs swell slightly in the evening due to the heat and stress. It is better to measure foot in the evening.
